### 1.0.5 logical & physical mode exploration

- 1) The subcategories are switches, routers, hubs, wireless devices, security, and WAN emulation.
- 2) D) The Webserver, Access Point, ALS1 all connect to switch ALS2.  
E) ALS2 is connected to the Access Point and Laptop1 is using a wireless connection to it.  
F) It is located in the Rack under ALS2 and above the WebServer.

Tasks

## Objectives

- Part 1: Investigate the Bottom Toolbar
- Part 2: Investigate Devices in a Wiring Closet
- Part 3: Connect End Devices to Networking Devices
- Part 4: Install a Backup Router
- Part 5: Configure a Hostname
- Part 6: Explore the Rest of the Network

## Background / Scenario

The network model in this Packet Tracer Physical Mode (PTPM) activity incorporates many of the technologies that you can master in Cisco Networking Academy courses. It represents a simplified version of how a small to medium-sized business network might look.

Most of the devices in the Seward branch office and Warrenton data center are already deployed and configured. You have just been hired to review the devices and networks deployed. It is not important that you understand everything you see and do in this activity. Feel free to explore the network on your own. If you wish to proceed more systematically, follow the steps below. Answer the questions to the best of your ability.

**Note:** This activity opens in and focuses on **Physical** mode. Many of the Packet Tracer activities you encounter in Cisco Networking Academy courses will use **Logical** mode. You can switch between these modes at any time to compare the differences by clicking the **Logical** (Shift+L) and
